RESUME

Dan Barbarito

AI Architect and Full Stack Developer

dan@barbarito.me
New York City
barbarito.me

AI architect and full-stack developer leading data and AI delivery for enterprise teams. Works across strategy, architecture, and implementation to take ideas from prototype to production.

WORK EXPERIENCE

Associate Partner, Data & AI @ Fujitsu Wayfinders

2026 - Present

- Lead data and AI consulting engagements across strategy, architecture, and delivery for enterprise clients.
- Work with client leadership to determine where AI makes sense, what to build, and how to get it working in practice.

Senior Managing Consultant @ IBM

2018 - 2026

- Architect and deliver AI-driven solutions, leveraging machine learning, NLP, and generative AI to solve complex client challenges across industries, driving measurable business outcomes.
- Manage multi-million-dollar AI projects, overseeing end-to-end delivery, optimizing resource allocation, and ensuring on-time, high-quality results within budget constraints.
- Advise C-suite executives on AI strategy, articulating technical solutions in business terms to secure buy-in and align initiatives with long-term objectives.

SELECTED PROJECTS

AI to Help Customer Service Reps

Major Pharmaceutical Distribution Organization

Project manager and technical lead for a groundbreaking AI solution using speech-to-text, NLU, and entity extraction to boost customer service rep productivity.

AI in the Kitchen

Major Fast Food Retail Chain

Led development of an AI solution integrating demand forecasting, speech-to-text, computer vision, and robotics, optimizing kitchen operations.

Chatbot for Healthcare Providers

Major Health Insurance Company

Designed and managed an NLP-powered chatbot, streamlining healthcare providers' access to patient insurance data and improving workflow efficiency.

EDUCATION

Adelphi University

Bachelor of Computer Science

2013 - 2017
