### TECHNICAL EXPERIENCE

#### Managing Consultant / Technical Lead

April 2018 — Present

IBM

New York, New York

- Architect, develop, and manage solutions from the ground up to solve various business challenges for our clients. The projects within my consulting practice (Cognitive Analytics) primarily use machine learning, computer vision, and advanced analytics to provide necessary insights and optimizations for our clients.
- Project manager for multi-million dollar projects.
- Technical lead to help design, architect, and implement complex AI-based solutions.
- Lead design thinking sessions with clients to gather requirements, create process maps, and document current future states.
- Creator of internal Full Stack Development education courses with the goal of upskilling colleagues and mentoring others.
- Develop and manage various internal re-usable assets across the company to kickstart an new projects and extend functionality to existing ones.

#### Full Stack Developer

February 2017 — April 2018

Mission Disrupt

New York, New York

- Created visually stunning and feature rich websites for various different clients.
- Lead requirements gathering sessions to determine what pages and features to implement.
- Integrated third party APIs into applications.

#### Full Stack Developer

July 2015 — January 2017

Rogue Pod

New York, New York

- Created custom websites and applications for clients.
- Added and improved functionality to a number of high traffic websites.
- Lead the development of an Android iOS application which was developed using React-Native.
- Created an open source custom chat application for a client to use which had direct message and group message capabilities. The application was built using Ruby on Rails, Javascript, and Websockets.

#### Web Team

September 2014 — May 2015

Adelphi University

Garden City, New York

- Added and updated content throughout Adelphi.edu.
- Lead development on a Wordpress plugin that was designed to make repetitive tasks easier and less time consuming.
- Created and altered a variety of images using Photoshop that was used to advertise events and promotional offers.

### EDUCATION

Bachelor of Science in Computer Science, Adelphi University

May 2017
